TOP LIFE EXPECTANCY

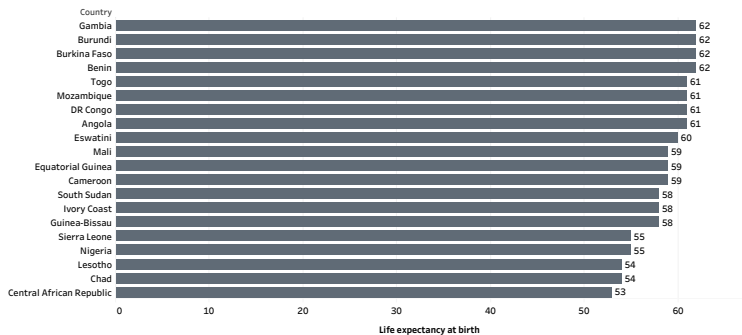

MOST SMARTPHONE USERS

Although China ranks first for mobile phone users they however only rank 107 when it comes to their total GDP per capita.

Monaco (city in France) ranks 20th in this case despite being 1st place in terms of their GDP.

BOTTOM LIFE EXPECTANCY

There seems to be some correlation with the GDP and the life expectancy as those nations who have a higher GDP per capita tend to live longer.

This could be mainly due to people having more spending/financial opportunities to better their lives in more healthier ways given the privilage of more disposable income.

Also in terms of smartphone users it comes the vast majority of nations that come up as having the most amount are mainly those who lower in terms of GDP per capita.
